CONSERVATION REBATES

CITY OF NASHWAUK

Conservation Improvement Program

Conservation is good for everyone.

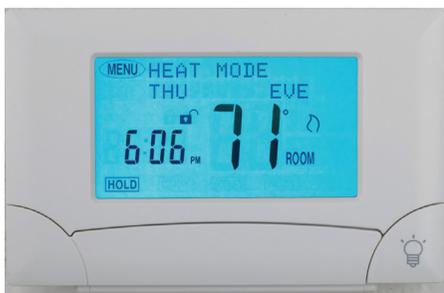

There are a lot of energy saving technologies on the market that could benefit the businesses and residents of Nashwauk.

This is why the City of Nashwauk is launching a new conservation program to be used as a resource for businesses and residents to help save energy and to provide financial incentives for implementing energy savings projects.

WWW.NASHWAUK.GOVOFFICE.COM

WHAT IS A Conservation Improvement Program (CIP)?

CIP is a tool for commercial and residential utility customers within the City of Nashwauk service area to help save energy and provide money-saving resources. The City of Nashwauk is providing a no cost service to its customers to help provide energy efficiency assistance and financial incentives for conserving energy.

SERVICES FOR RESIDENTS

The City of Nashwauk provides rebates to residential customers who install energy-efficient technologies in their place of residence that save energy. Contact the City or refer to the website (www.nashwauk.govoffice.com) to determine if your planned project qualifies for a rebate. You can find rebate application forms at the City Offices or print directly from the website.

CONSERVATION REBATES AVAILABLE FOR:

PRODUCT	REBATE AMOUNT
ENERGY STAR Refrigerator	\$100

ENERGY STAR LED Fixture	\$15 per fixture
LED Bulb	\$3

SERVICES FOR BUSINESSES

The City of Nashwauk provides rebates to customers who install energy efficient technologies in new facilities or retro fit existing facilities. The City of Nashwauk encourages its customers to make energy efficiency upgrades through providing financial incentives to help buy down the cost of the project. Contact the utility company if you think your project may save energy and a custom rebate will be processed based on the amount of energy savings. The following is a brief list of items that qualify:

- Energy efficient lighting
- Lighting controls
- Variable speed drives
- Energy-efficient air conditioning
- ECM fans
- Air conditioning systems
- Refrigeration improvements
- Energy management systems
- Energy recovery units
- And more ...

Maximum annual rebates are determined by a customer's average kWh billing. Contact April Kurtock to determine if your project qualifies and the rebate amount for the project.
